human variation

Webstac
Software Pvt. Ltd.

(Web Based Statutory Compliance)

Compliance: The Necessary Evil

Compliance with the rules, laws and regulations, is by far the most tedious, yet a mandatory process, where both financial and legal stakes are extremely high.

Though the compliance procedures are typically carried out by people at lower/middle management level, the legal liability lies with top-management and it bears huge impact on business.

Many get anxious & afraid about this compliance because of these factors

Webstac: Takes the Sting Out

Through innovative softwares, WEBSTAC offers customized solutions for any kind of compliance with rules, regulations, procedures and requirements at every level.

For instance, In Health, Safety & Environment for any manufacturing facility, around 38 Acts and 46 Rules need to be complied. Webstac is a one-stop solution for information on HSE rules and regulations applicable for a specific industry and an easy, accurate and consistent tool to comply with these legislations.

Two types of services are devised to suit your needs...

Crucial deadlines

Tedious nature of procedure

Need of accurate & varied information

Availability & accessibility of historical records

Understanding of the concerned person about rules & laws

Engineering gaps in existing systems/ applications/ programs

Hierarchical & organisational behaviour issues

Application based:

Softwares that allow your employee to access & fill the requisite forms and your top management to modify, forward or approve the forms

• **TAALC_e** (**T**racker for **A**udits, **A**ctivities & **L**egal **C**ompliance _ **e**nterprise)
